What will replace it?

Why Crypto currency?

The Rothschild group know that the dollar is heading in one direction, and that's not upward.

So, they buy up Gold, Silver and invest where this digital age is heading...towards Digital Currency.

They know USA is not the place to launch this Digital Currency so they have established a Crypto Currency company (LCF) with a top businessman in China.

In a very short space of time, there are now 300 top leaders in China poised ready to EXPLODE LCF onto the marketplace.
